I've put in about five hours into the game and am happy to report that this is the best VR baseball hitting simulator to date! The inclusion of 6 different pitches adds an extra element that makes batting practice that much more realistic/enjoyable. Don't believe me? Set the pitcher to lefty, HOF, with nothing but fastball and slider (hello Aroldis Chapman).

The HR derby mode is great and allows for customization. There are definitely a few kinks to be worked out (sometimes the settings don't carry over when you reset a game), but overall this is a great product if you're looking for a baseball simulator.

I would love a "story mode" where you go up against pre-programmed pitchers with different pitch sets and your job is to score a certain number of runs off of them. Have them move pitches around and intentionally throw balls and strikes.

If you don't love baseball and going to a batting cage, then this game may not be for you. But if that's your cup of tea, you'll love this simulator!

Update - 5/15/2017

The game as it currently stands appears to be broken/very glitchy. When a pitch is thrown, the game doesn't register that it's been thrown and you're forced to reset the game in order to have another pitch thrown. This is very frustrating as it's been happening more times than not right now. It seems like it's happening when a ball is thrown and the system doesn't register that the pitch passed through the plate. Please work on a fix for this!. DO NOT BUY! GAME IS DEAD!

Completely wasted potential. I was one of the few who believed in this game and its developer, Lion game Lion. Unfortunately, after just a couple of updates, the devs went silent, completely. They thought they could get away with using an ancient game engine (designed primarily for racing games btw) like Payday did, unfortunately, combined with terrible AI, bugs, crashes and more, it all backfired on them.

. Good try, but the joystick mapping is just horrible. If you feel like wasting 2hours trying to figure out which one of the numerous axis is the one you want, then this game is for you.

After a long time, Rudders are still not supported. Mapping your thrusters to the sliders on a HOTAS is still a nightmare (you have to figure out which axis is used, and for hotas, bind the reverse speed to the 2nd axis in reverse..????).

Once all is finally mapped, you'll see the controls are not natural at all. It's like using a Gamepad stick emulator for the flight, it feels very poor when flying :(A fun addictive game, similar to angry birds. Makes you want to keep playing. The graphics are solid and the animation is arcade patterned. I would recommend this game for anyone who wants a simple fast paced interactive game.. I love this game, played it for years damn near flipped when I heard it was on steam. and I have to say this is one of the best games I've ever played. I dont care if its pay to win. Free game what do i expect. Love the game. I may have dropped a little money on it and by little I dont mean \$100.00 a week into it or the more extreme amounts payed. But hell I cant argue with this

game on they way its runned.

Numba deluxe is an exciting and challenging logic game. Just create some Numba-Chains to gain more points. There are 3 different types of gamemodes:

1. Classic
2. Timeless
3. Puzzle

Some levels are pretty challenging, but you can relax during playing this game.

It's not really expensive.. 3\u20ac are worth for this good game. Especially when you can get a coupon when you craft a badge! Then it's really worth it. I just have to recommend this game.. There are alot of logic games.. But this one is one of the best..

The Action, The Comedy, The Yogscast (wait, what). It's all so beautiful! It's a RPG, It's a Campaign, It's, perfect.

So grab yer Pickaxe and Beer, (inhale) DWARRRRRRRRRRRRFFFFSSS!!!!. Weirdly engrossing. It's got a very relaxing vibe that I can see remembering fondly down the line.. This game predates Men Of War (MoW), but will definitely appeal to anyone who is fond of those games. It is similar to MoW in that it is an in-depth combat simulation involving anything from infantry to vehicles to planes, each with their own inventories, names, and experience. It diverges from MoW in that the engagement distances and overall scale of things is far closer to reality. Tanks can actually thow mass several km downrange and still have lethal momentum. Even rifles can shoot several hundred meters. It is slower paced than MoW, but is larger scale and is much more persistent in the single player, with infantry and crew members each gaining experience that you get to allocate into their different aspects and medals that you get to award them. Everything carries over from one campaign battle to the next, and what you've got is what you've got: losing armor or entire squads really hurts. All in all, it is a clunky but very respectable (even lovable) game and certainly has it's sights on what's important. I hope they make a Theatre of War 4 with engine and interface improvements, more factions, and the ability to play a drop-in multiplayer campaign. That will be an instant buy.. A very nice little story driven game,Made me realise how small thing could become big.

If you loved to the moon,a bird story or finding paradise,this one is for you!

. Love the simulation. Hard to learn, longer to build, and realism is at an Everest sized peak.. top game , top sounds. Very - very nice. Really funny and entertaining sort of cartoon eSports team manager sim. In the vein of other management sims but with a funny storyline and devs constantly working and improving the game. Definitely worth the buy!
