About This Game

Orcish inn is a tavern simulation game in which you take the role of an innkeeper starting out in unsettled lands. You gather resources, farm all sorts of crops like hops and oat, brew your own beers, construct a tavern piece by piece and welcome various orcish clans to your very own place. The game interweaves aspects of management and simulation with those of survival and exploration.

- **FARMING:** Plant and harvest various types of crops like hops, oat, sugar-beets, tomatoes and many more, which are then sold, eaten or used as beer flavor.
- **BREWING:** Brew your own types of beer and influence your guests by defining the beers' taste, tint brightness, full body, bitterness, alcoholic strength and flavor.
- **PRODUCING:** Gather and process resources, like chopping trees for logs and process them into lumber planks and decorative planks spent in building and crafting.
- **CONSTRUCTING:** Construct buildings like brewing facilities, taverns or dorm rooms by putting down walls and floors and decorate the created rooms with crafted furniture.
- **SERVING:** Serve the visiting orcish clans by fulfilling their wishes, fine-tune prices or the beer's taste or risk getting battered in a huge pub brawl.

- **AND MORE:** Raise and breed animals like pigeons, which swirl around and bring back useful items, or wrest valuable treasures from the ocean with your fishing rod.

The game is in development since 2014 and the unfinished pre-alpha is currently available for free.

DROTH'YAR
Image: Droth'yar
This creature resembles an oversized two-legged lizard with large horn that curves back towards its tail.
Racial Modifiers: +6 Acrobatics, +8 Survival
Droth'yar are swift, two-legged herbivores, used as mounts and beasts of burden. A droth'yar's body resembles that of an oversized lizard, bearing two thick legs but lacking forelimbs. Its head is vaguely draconic and sports a large horn which curves back toward its tail. Though a droth'yar walks upright, it keeps its neck lowered to help maintain its balance. Its tail drags behind it, nearly the same length as its body. An adult droth'yar stands about 6 feet high, is 12 feet long from its head to the base of its tail, and typically weighs in excess of 1,000 pounds. Droth'yar have tough, mottled hides, colored in earth tones.
Droth'yar are highly adaptable, and several different breeds have evolved in different regions. Those found in arid lands are leaner and have longer legs than most, while droth'yar in areas with particularly harsh winters have been known to grow sleek coats of fur. All droth'yar are strict herbivores, and regularly eat plants poisonous to most species.
Droth'yar herds are usually led by a single dominant male. During
